FOREWORD

Dear Friends,

I am very glad to present the Yearly Activity Report 2009. It is the first time that we have prepared it in such a form and we hope that it will be well received by you.

The year of 2009 has proved to us once again that we have a caring and loving God. While many organizations have had to reduce their activities or, worse, shut down as a consequence of the economic crisis, God has blessed us with the possibility to go on and develop our projects.

The beginning of the year was very difficult and we had to solve several serious issues with the Fiscal Inspectorate. Despite all these challenges, we strongly held onto Christian principles and our efforts have been fully rewarded.

In terms of outcomes, via our projects, Bethania helped over 200 children from orphanages to spend their vacations with loving and caring families, provided for 7 graduates from the orphanages to be placed in three-year care, placed 29 children in 9 foster families, and facilitated 85 children to receive professional medical assistance. Over 50 children from Tintareni and 16 from Bulboaca attended the After School Program and Bulboaca's Day Care Center, 20 teenagers participated in the Teenagers' Club, 25 elderly people received lunches daily, 150 children rested at the Summer Day Camp, and over 350 children participated in the Children's Day Celebration. We also cared for 7 students, which are graduates of the Transition House project, at university.

In 2009 our Transition House Project celebrated 10 years of activity. In March we hired a new bookkeeper who is doing a great job and is one of our Transition House graduates. I would like to mention that two of the Transition House graduates have joined our team: one of them has been working as a social worker since 2008 and the other one is our new bookkeeper.

On behalf of Bethania Christian Relief Association I would like to express our deepest gratitude and respect to you all for making it possible for us to carry on our activities. We appreciate your financial support and assistance.

Sincerely,

A handwritten signature in black ink, which appears to read "Ilie Coadă". The signature is written in a cursive style.

Ilie Coadă
President

Mr. Luca Lupan, principal of Ion Creanga High School, Tintareni

Bethania started its activity in a period when our community was passing through social, economic and political chaos. Its activity has been addressing

the needs of the most vulnerable categories of people: children, teenagers and the elderly.

As principal of the local High School, I have a direct link to the Transition House and Christian Community Center projects. Several generations of the TH girls have studied in our school. I am very pleased to see the results: some of them have already finished their Higher Education and are involved in their new field of work. One of them came back to our school and works as teacher of foreign languages.

The activity of the Christian Community Center is welcomed by us, too. Here children with a difficult family background come and are cared for. They receive physical, educational and spiritual support.

Bethania's activities are well regarded by our community and local administration. I wish them blessings and further development.

Mr. Ion Mastac, mayor of Tintareni village

Since its foundation, Bethania Christian Relief Association has been offering hope to hopeless people from our country.

Our community, as well as the neighboring villagers, have been very impressed by its activities.

Children from socially vulnerable families have the opportunity to receive emotional and educational care that they lack at home. We have many elderly in our village who live alone and have lost their hope. Bethania offers food, as well as emotional, spiritual and material support that they don't receive from their own children or relatives. Children from orphanages are placed in healthy families where they learn life skills that they will need in their adult lives. The Summer Day Camps organized by Bethania are welcomed by the children and by their parents. They know that their children are safe, participate in interesting activities and are treated with love and care.

On behalf of our local public administration, I would like to express our gratitude and respect to Bethania Christian Association for their contribution in building a healthy society and helping desperate people.

INTRODUCTION TO BETHANIA CHRISTIAN RELIEF ASSOCIATION

Our organization came into being in 1998 as a Christian, non-profit, charitable organization founded by Ilie Coadă, pastor of the Evangelical Baptist church in Tintăreni, Anenii Noi region.

At that time, the organization was operating under the name *Dorca Christian Relief Foundation*. During the years of operation, we implemented several social care projects, material support, family care and children support projects on our own behalf and in partnership with DORCAS AID International (Holland).

In 2001 the organization changed its name to BETHANIA Christian Relief Association. Changes in political, economic and social environment in the Republic of Moldova revealed new challenges for BETHANIA.

The need for operating projects in the areas of human trafficking prevention, social and family

integration of children from orphanages and boarding schools, as well as day care for children from vulnerable families increased dramatically.

BETHANIA started to develop and implement projects that would respond to the most urgent needs of our people.

We believe that one of our achievements and blessings that we have at this moment is the creation of a team of workers who share not only professional, but personal values, which makes our projects possible.

The year of 2009 significantly strengthened BETHANIA Christian Relief Association as an organization that is addressing immediate concerns of the community we live in.

BETHANIA ORGANIZATION CHART

The **General Assembly** is the superior decision-making body of Bethania, gathering all its members. It convenes once per year and decides on the policy of the organization, elects the members of the Executive Board and the president, and decides on any affairs related to Bethania's activity.

The **Executive Board** is in charge of the daily operation of Bethania. It takes care of all administrative affairs and is elected by the General Assembly for a five-year mandate.

The **President** is named by the General Assembly for a five-year mandate, sits on the Executive Board and is responsible for overall management and operation of Bethania and protection of Bethania's financial assets.

The **Project Managers** plan, execute, and finalize projects according to strict deadlines and within budget.

PROJECTS

BETHANIA' s projects cover the following fields of operation:

- Child Care and Education
- Human Trafficking Prevention
- Social and Family Integration of Children from Boarding Schools
- Elderly Care

IL PONTE

Il Ponte project is designed to offer an alternative to institutionalized children by putting them in contact with a loving and stable Christian family that will give these children the opportunity to experience and be part of a healthy home. They are encouraged to grow, develop, and be all that God intended them to be.

We work with 6 out of 60 boarding schools, which host 12,000 children.

In 2009 Il Ponte project operated in the following directions :

1. Short-term placements (from 2 weeks to 3 months)
2. Long-term placements (Il Ponte families) (up to 3 years)
3. Foster care
4. Medical assistance
5. Training workshops and seminars for families.

A. SHORT-TERM PLACEMENTS

We continued to work closely with families willing to care for children from orphanages and boarding schools. Our ultimate aim is to make a strong bond between the family and the child so that he/she will feel at home and eventually be placed for a longer period.

The recruitment and retention of families involved remains a priority for us. Visits to different evangelical churches have been made periodically to present the project and motivate more families. Also, we visit the families at least once (or as many times as needed) during the holidays and at various times to express our gratitude to them.

60% of the children have been placed in the same families 3 to 4 times.

Short-term placements	2007	2008	2009
No. of ST placements	128	234	198
No. of families involved	81	125	140

Mrs. Parascovia, director of Drochia orphanage

Our school has been involved with Il Ponte for several years already. I was skeptical in the beginning. I was not sure that people without any training would be able to establish contacts with our children. I was wrong. I still don't understand how you do this, but the result is great. Children come back so happy that others envy them. I am also sure that in your families they are secure and treated well.

B. LONG-TERM PLACEMENTS

Long-term placements aim is to support orphanage graduates. Unfortunately, most of the institutionalized children go to the orphanage at an early age and spend a great part of their childhood and adolescence there. They feel lost and unprepared for life when they leave. As a result, they are highly vulnerable and exposed to a variety of risks, especially trafficking.

The first placements took place in 2006. During the period of 2006 through 2009, 7 orphan graduates were placed in a family context where they would be cared for and supported during this time of learning and finding employment. Six are currently in a college or University, and one graduated from a professional school and is in the process of finding her first job.

EDUARD AND MARIANA ROSCA FAMILY

2. Long-term placements	2007	2008	2009
No. of children placed	4	5	7
No. of families	4	5	7

C. FOSTER FAMILIES

GHENADIE & DINA BULGARU WITH CHILDREN

Foster care is a result of short-term placements. Families and children get to know and love each other so much that they decide to live together. As a result, children are in a safe, well-functioning, stable placement and are developing optimally. The families must pass through a very complicated procedure of becoming foster parents: they need to present many documents and certificates to the authorities, and they spend hours driving from their village to Chishinau and back home. For some families, the procedure takes more than one year.

There has been an increase since 2007 in foster care from 18 children to 24. Services include monitoring, assessing, training and putting them in contact with agencies that work in this area.

Testimony from Genadie Bulgaru, Larga

My wife and I have three children. When I heard about these children from the orphanages I knew that as a family we had to do something. When I went to the orphanage and saw them, I wanted to take all of them into my family. It wasn't enough for us to take children just for a short period, we wanted to do more. At this moment, we have four children in our family and we are in the process of preparing documents in order to become their foster family. It is not always easy, but I don't show any preference between my biological children and my foster children. I love them as my own, and I believe that we have to show them God's love more than speak to them about it.

Foster Family	2007	2008	2009
No. of children in foster care	18	22	24
No. of foster families	6	9	9

D. MEDICAL ASSISTANCE

VICA IN THE HOSPITAL

Professional medical assistance to children from orphanages is another aim of our project. The health of institutionalized children is very poor and the probability that they will receive good medical care in the orphanage is low. In 2008 an agreement with Children Central Hospital was made to examine and treat the children from these orphanages.

In 2009 we continued to offer medical help to children from the orphanages in Drochia and Strasheni. Even if the orphanages have doctors, medications and finances allocated by the state are not enough to cover the needs of these children. For this reason, we bring sick children to Chisinau, where they are better treated and cared for. Some of the children had to support more than one intervention.

Vica's Story,

Vica is a teenage girl from the orphanage in Drochia. When she was little she broke her arm. Because she didn't receive good medical help, her bone didn't grow correctly. Her right arm was shorter than her left one. She has had 3 serious interventions up to now. Even if she still needs to continue the medical treatment she looks with hope to the future.

	2007	2008	2009
No. of children provided with medical examination	-	37	85
No. of children who had medical interventions	-	17	37

E. SEMINARS

Il Ponte organizes seminars to provide training, guidance and support to our current and newly recruited families. Subjects discussed cover such issues such as attachment, discipline, effects of fostering, God's view on orphans, etc.

Seminars are organized at regional and national levels. They are attended by most of the parents involved. Officials from orphanages we collaborate with are invited to present their perspective. Foster parents are encouraged to share from their experience with the others. Seminars are allowing parents to frankly talk about problems and issues that they face during placement time.

Over the course of 2009, we held::

- 3 pre-placements seminars
- 2 seminars of evaluation
- 1 seminar for foster families

Due to pandemic flu that affected our country at the end of 2009, we had to cancel a seminar, which was planned in the southern part of Moldova.

Seminars	2007	2008	2009
No. of seminars	10	6	6

CHRISTIAN COMMUNITY CENTER

Our free programs serve children and teenagers from Tintareni and surrounding villages which are from the most vulnerable families, without parental care, and at risk of dropping out of school.

Every program is based on Christian principles, caring adult-child relationships, physical and emotional safety.

Christian Community Center includes the following programs:

1. After School Program
2. Teenagers' Club
3. Children's Day Celebration
4. Summer Day Camps

A. AFTER-SCHOOL PROGRAM

Since the year of 2000, we have been dedicated to providing free programs of critical academic support, enrichment opportunities and healthy nutrition to students in 3rd to 5th grades. This past year, ASP was available five days per week to over 50 students of which 86% are from Tintareni and 14% are from neighboring villages.

The ASP mission is to help children improve academically and to learn valuable life skills in a physically and emotionally safe place.

"Svetlana and Arthur are two Gypsy brothers. Because they are gypsies, they are treated with much indifference and suspicion by most of the villagers. When bad things happen in the village, their family is usually accused of being involved in the incident. The school teacher treats them as if they are mentally retarded. As a consequence, they feel marginalized, rejected, and abandoned by others.

They started to attend the ASP in 2009. They say that they feel protected and free here. They look happier and it has become easier for them to express themselves. Svetlana and Arthur are very active at the Bible lesson and are so happy when they are asked to say the answer."

AFTER SCHOOL PROGRAM AREAS OF FOCUS:

Academic Improvement. Three teachers provide homework assistance, test preparation and individualized tutoring in reading, writing and math. They make sure that our children better understand the lesson being taught in school. This kind of help they can't get always at home.

"This is a very good program that my children attend with pleasure. They prepare their homework, take part in interesting activities. Their teachers are careful and tolerant. They know how to make children happy. Thank you very much." – Parent of a 3rd grade student

If the parents served by ASP had to pay for its services, it would cost them about 74 Euro each month per child, while the minimum salary in 2009 was about 174 Euro.

Christian Basis. All of our activities are based on Christian principles. Those on our staff, all of whom are members of the local evangelical church, provide good role models of loving and caring adults. In 2009, 95% of our children have come from an Orthodox background and attend church only on important Orthodox holidays. At the Bible lesson, which is taught weekly they have the opportunity to learn about God, His word and His plan for them.

"I am very glad that this is a Christian program. It is the only place where my child learns about God and heaven." – Parent of a 4th grade student

AFTER SCHOOL PROGRAM AREAS OF FOCUS:

Educational, recreational and sport activities.

Typical activities include crafting, contests where they compete for prizes, table games, football, volleyball and tennis. These are just some of the outdoor activities that our children enjoy.

"My best day at the Center was when we celebrated my birthday. The cake was very tasty and the gift was very beautiful." 4th grade student

Healthy Nutrition. Taking into consideration the economically-under privileged family environment our children come from, nutrition plays an important role. Every day we offer a hot lunch, which consists of soup, porridge, meat or fish, tea or hot chocolate and sweets

"Marcella (3rd grade) and Mihaela (5th grade) are two sisters. They live in a neighboring village which is 3 km from Tintareni. Because they don't have a school in their village every morning they have to wake up to 5.30 a.m. and walk about 40 min. to get to the school in Tintareni. Even when they have a very long day and often they get sleepy during their classes, when they are finished with school, they come to the ASP. They have convinced their parents to allow them to come even if they have to make a long walk back home in the evening. They say that they enjoy being here, with their friends, very much."

Starting with fall 2009, we provide transportation back home specifically to our beneficiaries from neighboring villagers.

B. TEENAGERS'S CLUB

As part of the CCC, the Teenagers' Club aims to offer an alternative to teenagers from our community of spending their free time in a safe environment. They meet twice each week in a pleasant environment where they sing, play team games, discuss, listen to different subjects like drugs, alcohol, dating, future profession, etc. They celebrate their birthdays, Christmas, New Year, Easter, and visit different churches and similar clubs.

The program is lead by one staff person and a volunteer. In 2009, the TC was mostly attended by the ASP graduates and consisted of a group of 20 people. During the summer time, most of them had the possibility to rest in a Christian camp. Also, they get involved as volunteers at Children's Day Celebration.

C. CHILDREN'S DAY CELEBRATION

In Moldova, Children's Day is celebrated on the 1st of June. As an organization, we have established a nice custom of preparing a big festivity on that day at the Christian Center.

Every child deserves to be happy for at least one day in the year and we want to see big smiles on their faces.

Over 350 children from Tintareni and neighboring villages attended the program that started at 10 a.m. and ended by 2 p.m. The program included a puppet show, clowns, drama, games and songs prepared by our staff and volunteers. At the end of the program each child received an ice-cream and a roll.

Taking in consideration that we host such a big number of children, volunteers from the local evangelical church, Transition House and Shelter projects are invited to help on this day. This year, the working team consisted of about 40 people.

1st OF JUNE STAFF AND VOLUNTEERS TEAM

D. CHILDREN DAY CAMPS

In 2009 we organized three 10 day camps for 50 children each: the first two camps were organized by the local team, the first camp was organized by a Dutch team. One hundred and fifty children from Tintareni, as well as from other neighboring villages, took part in our program. Children came to the camp each day at 9 a.m. and left by 5 p.m. During this time they took part in different recreational activities like drama, crafting,

sports games, table games, and different competitions where they won prizes. Every day we had a Bible lesson that included drama, songs and a verse of the day. Ten young people, five of which were from the Transition House, joined our team and worked as group leaders and activity leaders. Each camp ended with a meeting with the parents where children presented what they have learned during the camp.

This year, we had to prepare more documentation than the previous years in order to be allowed to run the camps. This year was also the first year when our plan of activities had to be approved by the Education Department of our district.

Education Department of Anenii Noi District offered Bethania, in the person of Ilie Coada, a diploma of recognition at the annual meeting of teachers and educators.

ELDERLY CARE

In Moldova, the most vulnerable categories of people are the elderly and children; they are often left without care and protection. The exhort of the younger generation leave them without care and protection. In 2009, the minimum pension consisted of \$45, which places the elderly under the limit of poverty.

In 2008 Bethania began a program offering hot lunches 5 days each week to 25 lonely and isolated elders selected with the support of the community social worker. The project has been very well received by the community.

In 2009 we bought a building that is under renovation. Starting in 2010 we want to enlarge the sphere of our services and open an Elderly Day Care Center. The center will provide beneficiaries with a kitchen for meal preparation, as well as laundry and bath services. They will have opportunities for socialization, peer support, medical, social, and spiritual services.

BULBOACA'S CHILDREN DAY CARE CENTER

The village of Bulboaca is situated 18 km from Tintareni and has a population of 7000 people. CDCC began its activity in 2008 as an After School Program for children who come from a vulnerable family background, or without parental care and with difficulties in school.

In 2009 the After School Program welcomed 15-20 children 5 days per week. Two teachers, local Christians, help them with their homework, develop recreational and educational activities and teach Bible lesson on a weekly basis. Also, children receive a hot meal at lunch. The program is held in the local church building.

Even if children are eager to participate, most of the parents have shown a neutral attitude towards the program. During the year several attempts have been made to gather the parents and discuss what the children are doing here. Unfortunately, only a couple of parents showed some interest. Still, our staff visited each family and spoke to most of the parents at their homes. Besides the fact that children improve their academic results, another positive outcome is their desire to attend and participate at Sunday Church services. We strongly believe that through children we, eventually, get to the hearts of their parents.

"I enjoy very much coming to the center where we play, eat and do our homework. I love Mrs. Oxana because she is good, Mrs. Natalia is also kind to us. Miss Natalia is cooking great food for us."

"Children enjoy very much coming here. We would like to come to the center our entire life. We like the songs about God. We like the children. The food is very, very tasty. I love coming here."

BULBOACA CHILDREN DAY CARE CENTER

In 2009, we organized a one-week day camp for children from Bulboaca. This was a free camp opened to all children willing to come to. Several young people from Tintareni Baptist Church joined the local staff and helped to prepare the program, as well as organize the daily activities.

The camp started at 9 a.m. and ended at noon. We began every day with gym. During the day children were involved in a Bible lesson, drama, outdoor games, crafts, were served a meal and had a lot of fun together. The program ended with a presentation prepared especially by the children for their parents.

The days in the camp left good memories in their hearts. The majority of the children told us that this was the only recreational time they had this summer. In some cases, their families are too poor and they can not afford to pay for another camp or children have to work hard with their parents.

In Moldovan villages, children have few options for recreation. Most of the villagers are farmers and their children work hard to help their parents. Other children have parents working abroad and they are left without care. That's why, children enjoy attending programs like the Children Day Care Center in Bulboaca.

TRANSITION HOUSE FOR ORPHAN GIRLS

THE NEW GENERATION OF GIRLS

The Transition House for Orphan Girls is a three year project of social integration and prevention from human trafficking for graduates of orphanages and boarding schools from the Republic of Moldova.

Over the past year of 2009 several important events have occurred:

- I. Graduation of the 5th generation of girls;
 - II. New 6th generation of girls' selection process;
 - III. The 6th generation first months in the project.
 - IV. Ten Year Anniversary
-
- I. **Graduation of the 5th generation of girls.** In May 2009, 7 girls from the 5th generation graduated from lyceum. They all worked hard to pass the baccalaureate exams. It was a very tense period, but all of them succeeded and were admitted at different Universities. The girls have chosen the following areas of studies: Business and Administration, Social Work, Interior Design, Psychology, Sociology and Philosophy, and Pre-school Pedagogy. Thanks to the support of the transition program, girls who never would have dreamed of attending a university, have been able to fulfill their dream. Besides that, necessary documentation has been prepared to transfer the girls to Shelter project, which will supervise the girls during their period of study.

TRANSITION HOUSE FOR ORPHAN GIRLS

II. New 6th generation of girls' selection process.

The selection process started in January and lasted for 6 months. First, we contacted principles of different boarding schools and orphanages, made visits and gave presentations of the project. Every interested girl was invited to visit our TH. Also, they had to pass an interview with the social workers and the psychologist of the project. When the final decision was made, we contacted the principles and the girls.

The probation period lasted two months. On the 1st of September each of the 8 girls signed a three year agreement.

III. First months in the project.

The girls have been accepted at a lyceum in Anenii Noi (7 km from Tintareni). They are still getting used to the new school, teachers, and colleagues. They have to study very hard because most lack proper training and must improve their grades a great deal.

Unfortunately, one of the girls decided to leave the project. A new girl will be selected for the project in the near future.

IV. 10 Year Anniversary.

Our project celebrated it's 10 anniversary on August 8th. Twenty-eight graduates of our project came to the reunion. Some of them were accompanied by their husbands or children. These will be unforgettable memories that will last a lifetime! Each of the girls and workers shared their experience in being a part of the program here.

A PICTURE OF ALL THE PARTICIPANTS

SHELTER

The working team consists of Sam and Rodica Zwagerman (and their son Samuel), a Christian family with a big heart and specializing in social work.

Shelter is a continuation of the Transition House, which aims to protect our beneficiaries from human trafficking and support them during the hard period of moving forward towards an independent adult life. During the period of their professional training it is very important to receive support and have alongside them people who truly care for them.

SHELTER:

1. offers a safe place to spend weekends, holidays, times of illness, etc.;
2. supports them during their process of integration to independent student life and in the field of work.

Beneficiaries are graduates of the Transition House who attend a college of university.

Each beneficiary is treated separately and remains in the project depending on her specific needs.

SHELTER

Over the course of 2009, the following activities have been implemented:

- support during the enrollment process at University;
- support in obtaining the necessary documents to study without paying fees;
- support in obtaining a living room at the dormitory without paying fees;
- counseling, encouragement and support for each girl ;
- visits to their place of study and dormitory;
- interaction with the University teachers and officials to evaluate the beneficiaries' situation;
- medical assistance to those in need of it;
- visit to Holland with the aim of presenting the project.

In June, 6 graduates from the Transition House became our beneficiaries. All of them have been helped to enroll to different faculties. Unfortunately, two of them subsequently decided to drop out. Three girls from previous intake continued to be part of the project. At the end of 2009, the Shelter had 7 beneficiaries.

"I feel great in the project: appreciated, respected and cared for. Sam and Rody have always been here for me. I appreciate very

much that when I come back from university I have them to share my experience with. Also, I like the fact that I can choose what to do without having someone to tell me what to do and how to do it. We all share responsibilities. Another advantage of the project is the healthy and calm atmosphere where I can relax after a week of studies in Chisinau. I feel very much blessed to be part of the project." Doina, first year student and beneficiary of the project
